Dear Hiring Manager,

I am writing to express my interest in a Software Developer , Technical Program Manager position at your esteemed organization. With over 5 years of experience in software development and project management, I bring a unique blend of technical expertise, stakeholder engagement, and agile execution that I believe would contribute meaningfully to your team.

I began my career at Town Contacts Technologies Pvt. Ltd., as a software engineer, where I led the creation of service roadmaps, managed backlogs, and collaborated with cross-functional teams to ensure alignment with business goals. My work involved everything from drafting storyboards and wireframes to deploying data models and pipelines—skills that became foundational to my success.

Currently, I serve as a **Technical Program Manager at BlueBex Software**, managing five concurrent projects with remote coordination from Daejeon, South Korea. I work closely with development teams to deliver high-quality applications while ensuring user experience and product functionality remain top priorities.

My technical toolkit includes proficiency in **Laravel PHP, Python, and JavaScript**, as well as hands-on experience with **React, Angular, AWS, and MongoDB**. I am well-versed in Agile/Scrum methodologies, version control systems like Git and SVN, and I continuously aim to enhance both my coding and managerial skills.

Beyond my technical abilities, I bring a detail-oriented mindset, a commitment to continuous learning, and strong communication skills that have allowed me to succeed in high-pressure, fast-paced environments.

I am particularly excited about the opportunity to contribute to a team where innovation, collaboration, and user-centric design are valued. I am confident that my background aligns well with the role, and I would welcome the opportunity to further discuss how I can support your objectives.

Thank you for considering my application. I look forward to the possibility of speaking with you further.

Warm regards,

 Jothis Maria
